

### Dividend of the Coppers Lead.

In the amount of dividends paid to date, and in the size of the disbursements made by various companies, the copper mines of this continent are far in the lead of any of the other precious or allied metal companies, says the Daily Mining Record.

This is strongly shown in the record of twenty-five companies compiled and published recently. These twenty-five companies have since their organization paid out a total in profits that will soon reach 419,000\$. Within the first four months of the present year, including two comparatively small payments due early in May, they have paid out 9,317,574\$.

At the rate of payment indicated by these last-named figures, there can be no longer any wonder at the great total of the profits which have been distributed to date. With over 9,000,000\$ going out to stockholders within a period of four months, the grand total for the year soon months into the eight and nine figure class.

Individual companies among these twenty-five have made records that may well be described as stupendous. The Anaconda and the Amalgamated, allied companies, have each paid out in profits over 75,000,000\$, or a total from their properties at Butte of more than 150,000,000\$. Even greater than these two records is that of the Calumet & Hecla, which since its organization in 1871 has paid out profits that go above 120,000,000\$.

The new district as well as the old are represented in this list of copper producing profit earners. The Miami of Arizona started upon its career last year, with two payments so far this year, that bring its total to date up to 1,844,928\$.

Michigan, Montana, British Columbia, Sonora, Arizona, Nevada, Tennessee and Utah are the states represented in this list. Some of the properties are noted for the large profits realized from the treatment of extremely low-grade ores, handled upon a tremendous scale; others are known for the quantities of rich ores, even of pure copper, that have been taken from their workings.

The list of twenty-five includes Ah-meeek, Calumet and Hecla, Copper Range, Isle Royale, Mohawk, Osceola, Quincy, St. Mary's Mineral Land, Wolverine, Amalgamated, Anaconda, and North Butte, Tuolumne, British Columbia, Granby, Greene, Cananea, Miami, Old Dominion, Shannon, Shattuck Arizona, Nevada Consolidated, Nevada Douglas, Tennessee, Utah Consolidated and Utah Copper.—Bisbee Review.

### Carter Domain is Now Being Fenced In.

Harley Dillon, foreman of the Valinda Rancho of George A. Carter in Williamson Valley, reported yesterday that the big acreage is to be enclosed with a single fence, and that the work is now going ahead energetically, to be completed in about three months.

Fifty miles of fencing will be required to cover the entire township Mr. Carter now owns, and which is to be devoted solely for ranging his large herds of cattle. This undertaking with the exception of the Baca Grant interest, the fence of which has been demolished in recent years is the greatest this section of the State ever witnessed.

Mr. Carter also is erecting one of the finest country residences in this section, which covers a ground space of 50x125 feet, and which is to be furnished with all of the luxuries of a city home. Both improvements are creating favorable comment in that section.—Prescott Journal-Miner.

Thirteen copper claims at Apache camp, owned by Daily brothers, have been deeded by them to the Daily Arizona Copper company, capitalized at 500,000\$ divided into 500,000 shares. Two hundred thousand shares of this stock has been placed in the treasury of the company to be sold for development purposes. The company has just secured from the Arizona Corporation Commission a permit to offer 25,000 shares of stock for sale at 20 cents a share. The claims are in the Old Hat district, at Apache camp, and are immediately between the two properties purchased by the Copper Queen Consolidated Mining company. The Dailys believe the property will develop into a mine as valuable as the Calumet & Arizona.—Tucson Citizen.

### Three Carloads of Solid Copper.

Three carloads of solid copper nuggets were taken from a pocket in the Santa Rita mine, the property of the Chino Copper company, in the Mogollons, in New Mexico, and shipped to the El Paso smelter, according to a mining man who arrived in the city a few days ago, says the Tucson Star.

The finding of such ore pockets is not unusual at the Santa Rita mine, which is an unusual mine in many respects, but this one was unusually large. The mining man exhibited one of the nuggets, which vary in size. This one was an inch in length and half an inch thick. It had at one time during the history of the earth been smeltered by the natural heat of the earth under volcanic conditions.

The Santa Rita mine is a mine without shafts, tunnels or cross-cuttings. The top of a hill is being scooped off and the ore taken out by enormous steam shovels, twelve in number. The alloyed ore is low grade copper, running about 3 per cent, but when these rich pockets of solid copper nuggets are found the copper yield is large. It is said that the ore yields sufficient gold to pay for the cost of operation. The company operates a concentrator on the property.

At a distance the mine appears to be a stone or marble quarry, for it is worked only from the surface. A similar property, which is undeveloped, is said to lie near Kelvin, in this state. It is distant from railroad facilities and hence capital has been wary of developing it.

Under the new marriage law applicant for license must submit physicians' certificate of health, and the application for a marriage license must be made at least five days prior to its issuance.

### Wonderful Skin Salve.

Bucklen's Arnica Salve is known everywhere as the best remedy made for all diseases of the skin, and also for burns, bruises and boils. Reduces inflammation and is soothing and healing. J. T. Sossaman, publisher of News, of Cornelius, N. C., writes that one box helped his serious skin ailment after other remedies failed. Only 25c. Recommended by H. H. Watkins.

### Notice to Creditors

Estate of EDWARD P. FORD, deceased.

Notice is hereby given by the undersigned, A. J. McKelvey, Administrator with the Will annexed of the estate of Edward P. Ford, deceased, to the creditors of and all persons having claims against the said deceased, to exhibit them, with the necessary vouchers, within four months after the first publication of this notice to the said A. J. McKelvey at the Citizens Bank, at Kingman, Arizona, the same being the place for the transaction of the business of said estate, in said County of Mohave.

A. J. MCKELVEY,  
Administrator with the Will annexed of the Estate of Edward P. Ford, deceased.  
Dated at Kingman, this 20th day of May, 1913.  
First insertion 24 May—21 June.

### Mineral Application.

Survey No. 3028.  
Serial No. 022363

UNITED STATES LAND OFFICE,  
Phoenix, Arizona, May 20, 1913.

Notice is hereby given, that J. F. Luthy, by H. H. Watkins, his Attorney-in-fact, whose post-office address is Kingman, Arizona, has made application of the United States for patent on the Salt Spring lode mining claim, situate in Salt Spring Mining District, Mohave County, Arizona, approximately in Sec. 4, T. 39 N., R. 19 W., G. & S. R. B. & M., unsurveyed, described as follows: Beginning at cor. No. 1, whence U. S. M. M. No. 3027, bears S. 7° 01' E. 2532.7 ft. Thence N. 5° 47' W. 600 ft. to cor. No. 2. Thence N. 84° 13' E. 1500 ft. to cor. No. 3. Thence S. 5° 47' E. 600 ft. to cor. No. 4. Thence S. 84° 13' W. 1500 ft. to cor. No. 1, the place of beginning. Containing 20,661 acres. There are no adjoining claims as shown by the official plat of survey. The notice of location is filed in the Mining Records of Mohave County in Book L, page 75.
